Composite Doors

Welcome

The Solidor collection is an outstanding collection of solid laminate 48mm timber core composite doors that combine classical or modern styling with high security locking which provides a stunning, high quality and secure entrance to any home. Each solid timber core is completely encapsulated within highly durable plastic edge banding and two thermo plastic door skins so you will never have to worry about painting or varnishing your solidor.

These exclusive doors are available in a wide range of style and colour options (including two blacks, foiled Sherwood oak and rosewood) the option of a low threshold making it the perfect solution for easy wheel or push chair access.

A comprehensive range of matching combination frames is also available with woodgrain options, that will compliment the look of any property. All our doors carry a full ten year guarantee so you can rest assured that a Solidor will still look good for many years to come.

All our composite doors conform to PAS 23 - 1:1999 and PAS 24 - 1:1999 standards of weatherability and security.

Due to our continuous policy of development we reserve the right to change specifications without notice. Due to modern printing methods we cannot guarantee the accuracy of the colour reproduction shown in this brochure.

Hardware carries a full 12month guarantee. (Excluding multi point lock)

The Solidor green promise

At Solidor we believe that the future of our planet is important, not only for ourselves, but for our children. That's why we minimize our waste, use environmentally friendly products and run an extensive recycling programme.

We recycle all of our packaging, polystyrene, cardboard, PVC-u, timber, paper, aluminium and steel.

All of the timbers used in our doors are harvested from carefully managed fast growing forests.

Our door outer frame is manufactured with 5 chambers for optimum insulation values and our door leaf is 48mm, 10% thicker than the standard to help keep the warmth in your home. Also Our Kommerling door frame is the first PVC-u system where all of it's products are lead free thus minimizing the impact on the environment.

Our werbar door frame reinforcing is manufactured from 100% recycled material of which the majority is actually old first generation PVC-U windows. It also has virtually no heat loss compared to high levels of heat loss with steel and aluminium reinforcing. Solidor is the first composite door company to use this product as standard in all of it's door frames.

Our composite door slabs are prepared and manufactured at our factory in Staffordshire to reduce the carbon foot print of each door.

All of the off cuts of our PVC-u outer frame are recycled and used again in various products.

We also share our transport with our sister company to minimize our carbon foot print and the pollution on the roads.

Finally all of the parts used to manufacture a Solidor composite door can be fully recycled at the end of it's life.

Our composite doors can help to keep your home warm and secure with the knowledge that your door is safe and as green as can be.

Rest assured that as a company Solidor is committed to doing its part in helping the environment.
